TUBULAR DOME ADDITIONAL RECOMMENDATIONS::

Although our recommendations on our purchase agreement primarily deal with conventional (non-tubular) dome installation—wanted to include this for your ease in installing. Screws are provided with your new dome. Although most tubular domes this style do not have any sealant or weatherstripping—it would not hurt to apply a thin weatherstrip or a small amount of 100% pure silicone between your dome and the flashing where it mounts. The space you have between the two will determine the thickness of the weatherstripping.
